## SpyderScope™ viewing system gives your vehicle inspectors the best chance to catch anything suspicious

**Single Operator** — See the underside of cars, trucks, buses, recreational vehicles, and tractor trailers. High quality optics, along with bright illumination, make discovering suspicious or concealed devices easy!

**Easy to Use** — Anyone trained in detection of explosives, drugs, and other security risks can immediately use SpyderScope™.

**Continuous Use\*** — Use SpyderScope for up to five hours on one battery, then use freshly recharged battery for continuous use. Fully recharged in one hour.

**Speed-up Facility Entrance** without compromising security.

**No Signal Emissions** — the SpyderScope™ has no disturbing, emitting, or transmission of signals. (Optional wireless transmission is available.\*\*)

**Performance** — The latest in Digital Signal Processing with normal video output — and fine components — ensures years of crystal-clear pictures, even in low light. Every SpyderScope™ comes pre-tested and pre-assembled.

**Optical Heads-Up Display Available** — Simulate a 52" monitor with Sperry West's lightweight headset display.

**One-year Warranty on Parts and Labor** — SpyderScope™ incorporates high-quality parts and craftsmanship.
